Re: Docket # 2008-2512

Dear Agency:

Should this letter raise issues of difficulty please feel
Free to refer the inquiry to another source.

If I understand the message of the cited docket to the public
The requesting corporation, PEC, has applied to your commission
To raise and recover costs from their customers in SC should
You grant approval for what is called "demand-side management" and
"energy efficient programs" to include an incentive to the company
In consistency with SC Code Ann. 58-37-20.

Obviously, this document needs some translation for what appears to
Be very general terms covering a very wide program including costs called "demand-side
Management" and "energy efficient programs" as proposed. There are *about*
Much of the detail not given in the docket.

My concern goes to the costs to the customer because this company, Progress Energy
Is already hitting its customers in SC by nearly doubling the *Costs*
Per kilowatt hour. Thus, this request demands great analysis by you as well as the paying
Customer. Furthermore, I would like to be a customer of this company and appear
In person at your hearing to lodge complaint at this time when time is precious coupled
With the language of the docket. I would suggest you advise the company of the
Company request. In your response please furnish time, date of hearing and the physical
Address of the hearing.

Andrew A. Welden
